

Skills4Work Limited - Gateway Resources

Our distance learning resources are available for individual unit standards and as combination packages that bring together related unit standards that fit easily as one assessment. Each of these includes learning material (that covers all the theory) and an assessment (that has written questions and a workplace practical). In addition to this we have identified where they form part of the relevant Vocational Pathways.

Students work at their own pace with help from their school Gateway coordinator and their workplace supervisor/manager/employer.

Here's how it works:

1. The student reads and understands the learning material then they complete the theory questions (with the help of the coordinator and/or the employer)
2. The student completes their workplace practical assessment in the workplace while being observed by their Workplace Assessor or Verifier.
Note that the Assessor/Verifier must have experience in that field and be able to sign the student off as being competent (for example this could be a manager, employer, or supervisor)
3. Send the completed assessment back to Skills4Work and our registered assessors will mark it for you (2 re-sits are allowed per assessment). Please allow a maximum of 15 working days for marking
4. We return the marked assessment to you and your school reports the credits to NZQA using our provider code.

The list also has some level 3 units. These units must meet the Consent and Moderation requirements (CMR) and the school must have evidence that they are being met. Therefore when offering resources at level 3 to schools; we will require confirmation from the school that the workplace environment meets these requirements.

If you wish to purchase level 3 units you must contact us **prior** to these being taught and assessed to discuss CMR requirements.

Skills4Work can be contacted on 0800 275 455 or customerservices@skills4work.org.nz

Note: Some actual units are due to expire, they will no longer be available in the future and their expiry dates have been highlighted in yellow, below. In some cases there may be a replacement unit, in others there is nothing replacing the unit.

Individual unit standards

Units on the vocational pathways list

● Construction & Infrastructure
 ● Manufacturing & Technology
 ● Primary Industries
 ● Service Industries
 ● Social & Community
 ● Creative Industries
